The Twis Lectures.

The public were much disappointed by the Inability of the Selectmen to furnish a Tufts lecture course last winter, owing to the fact that no hall within the limits of the territory prescribed by the terms of the will could then be obtained; but this difficulty has now been removed by a vote of the l'uiversalist society to allow the use of their house for the purpose, and the Selectmen are concerting measures to obtain suitable lecturers.

salist society to allow the use of their house for the purpose, and the Selectmen are concerting measures to obtain suitable lecturers.

In connection with the matter of legal restriction of the Tufts Elbrary and the lecture course to a delineil locality, we venture a suggestion which may nwaken as lively opposition as did the advocacy of the introduction of a water suppty at town charge; but when the facts bearing upon this new question of lown improvement are duly considered we think many of aur citizens will at least deep it to be worthy of attention and perhaps of future action. The nutliei library, by the provisions of the Tufts will, must forever have its legation at the Landing, and the lecturemust also be given there. The future wants of the library will require the erection of a smitable building in the time, and as such a structure should cover the two lots given to the town, and would necessarily be an expensive building, it would be a matter of economy, when such a work is begun, to include in its area a spacious town hall. building, it would be a matter of economy, when such a work is begun, to incide in its area a sparious town hall, with rooms for town oilieers, the hall to be also used for the lectures. With the building of an electric railway through the several villages and the convenience of railway trains between the North, East and Landing villages, the proposed site of the town kall would be much more convenient to a great majority of the people than is its present site, and the town would have a municipal building of architectural beauty and greater convenience. The time will come when the town will be called upon to creek a suitable library building, and the suggestion to make it the headquarters for town business is offered, for the consideration of our will, at no distant day, be taken in this direction, as we helieve it wonth be a public improvement, a public benefit, and no public convenience.

A warm controversy has been going on the past week between Col. Benj. S. Lovell, who is an active supporter and personal friend of J. Walter Hradler, the Republican motionee for Sheriff of the county, and Mr. John W. Bates who circulated the paper to seeme a mounination place for sheriff Endicott on the bullots. The Hoston Heraldhas devoted a large amount of space to the presentation of statements of the two gentlemen, and the matter bas now gone so far beyond the limits of our local columns that we are mable to make room for the particulars of the controversy, but Col. Lovell occupies space for condensed opinions of the press, in his favur.

To the Editor of the Brookline Chronicle: residing in Norfolk county, hereby en-Collitty:
John R. Bullard,
Alonga B. Wentworth,
Simon W. Hathaway,
Elisha Greenhood,
Robert H. O. Shulz,

Will you allow me to congratulate you in the manly stand you have taken in supporting the reelection of that trusty and faltiful public servant. Sheriff Endicott? (If what earthly consequence is it whether ho is a Republican or a Democrat? He has dome his duty ably and conscientiously. This is infinited even by his opponents. Who stops to think—or what seesable man cares—when a sheriff is serving a writ or summoning a witnessor discharging any other of his numerous dities, whether that sheriff is a republican or n democrat? What is it that is allenating so many valuable men from the ranks of the two leading parties today? It is just such unseemly exhibitions of narrow partisanship as this case illustrates. Let n public official do his best yet he hasy be huried from his position by the ring power of a few professional canens managers. Every mady sentiment, fair play business usage—even farsighted politics—favor the indorsoment and retention of a tried and foiliful public servant. Such a reward is the best possible stimulus to likelity, and the people gain thereby. In the lusiness world does the unrechant care whether his salesman or bonkkeeper is or is not a republican, provided he is able and faithful and without reproach? And yet this principle of rewarding morit, so well recognized he every stage of life, in the schoolroom and the conting room, in the household and in the outside world, has to be abandoned in polities to satisfy the dictates of a few partisan wire publices. Perings it is not to be wondered at that such mob ignore well settled lussiness methods, for most of them are not conspictory as the not gain of the capally entitled to a reelection. When I was not a Republican, remained record of the wondered at that such mob gaore well settled lussiness nethods, for most of the funition and a benecrate to be wondered at that such mob gain and the court was not a Republican, reflection and the court of the luna whom they sought to overthrow, but claining that he was not a Republican, reflection the prese

isited with his record, monothously de-clined to nominate anyone of their own party to run against him. Can we not be equally honorable in our treatment of Mr. Endicatt? It is inconceivable that his election, which must (and I hope will) be necomplished with the ald of republican votes, can injure the Re-publican party, but I venture to say that his defeat would prove a costly victory, and one which the better ele-ment of that party would deeply re-grel. The only mistake made by a voter that has come to our knowledge was made by a life-long Republican resident of ward three, who went through with the required motions all right, but after the required motions all right, but after he had deposited his ticket in the box and retired from the enclosure, a sudden conviction fashed upon his mind that he had gone back upon his favorite party by crossing the Democratic cnididates, under the erroneous impression that by so doing they were crossed off the ticket instead of being selected for his approval. He took the chiling which followed his avowal of the mistake with good humor, and will "never, take with good humor, and will "never, never do so again."

There was one ballot deposited in Ward 3 which had no marks upon it, this probably being due to ignorance of this product being due to galvance of the requirements for correct expression of suffrage, or may be that not a candi-date on the ticket was good enough for the extra pure voter. This ballot was counted in the return of blanks, which rould add 20 to the number. Where there was a cross for one candidate in fice, there would be no blank in that office, but if only one officer mas voted for all the rest of the ticket was counted as blanks, and at the count for files were evened nu so that the votes number of ballots cast. In the iletails the returns for the several offices do not correspond in totals, owing to no returns being made to the Town Clerk of blanks in Ward 5. What effect this Inquiry may be made for the other ballots which would make a tally for each fice, we are unable to say. A ripple of excitement was created

The International Maritime Exhibition.

The country is to be congratulated on the phenomenally successful culmination of the plan to organize the International Maritime Exhibition. On Momlay, Nov. 4, the great Mechanics' Building at Boston, was thrown open to the public, affording opportunity to Inspect the best examples of all the industries of the United States allied in build a larger structure, which will ship eanstruction and navigation. Over live hundred exhibitors applied for space. The principal exhibitors employ an aggregate capital of nearly \$200,000,-

an aggregate capital of nearly \$200,000, 000, and engago the services of many thousands of skilled workmen. It is doubtful if an exhibition was ever held in any country devoted to a special line of industries, that presented such a phalaux of industrial process us is demonstrated in the Maritime Exhibition. This event is a most appropriate and gratifying climax to ellorts that have been pursued with more or less vigor for years, to convince the people that America can and does build the illuest and fleetest ships adoat, and with proper encouragement of shipbuilding, can acquire a leading position among the maritime nations of the world.

The exhibition is so comprehensive and educational that it should be attended by nil classes of men in every section of the cauntry who are in any way interested in the development of our military and merchant marine, and will prove to be u prime fuctor in the restoration of the merchant parine of our country to its former stauding.

The prospective increase of business at the Fore River Engine Works, fram which may eventually arise large operations in the line of steam yacht bulling would abundantly repay the expense of the river improvement, and the increased convenience of navigation would be a further alivantage in coming years. Speaking in general terms of the importance of such improvements the Marine Journal says that wherever there is a city alignent to the sea or a great inland lake, which requires the enlargement and deepening of its meagre waterway, it is soming policy to spend money in getting deep water to and from such a rity. There is the city of Glasgow, in Scatland, for instance. If the little stream leading up to it from the sea had not been ling out, deepened and drediged, and so maile an ample waterway, tilasgow would not now be the city she is in rommeree and shipping. The same may be sail of a number of our own cities. There are many prints on our cless. Danger from Catarrh

Calurch is an exceedingly disagreeable disease, its varied symptoms—discharge at the nose, hall breath, pain between the eyes, coughing, choking sensation, riaging anises in the ears, etc.—being and only troublesoms to the sufferer, but offensive to others. Calarch is also dangerous, because it may lead to bronchitis or consumption. Being a blood disease, the trum method of cure is to purify the blood by taking Hood's Sarsaparilla.

"For several years! I had been trouble! with a kind of ashime or calarch in my threat. My will wanted me to try a bottle of linod's Sarsaparilla. "I must any! wan very much benefited by using it and would recommend it very highly,"—ELIAS P. DEVRIES, Omaha, Nab.

informs us that from the five incandescents he obtained nearly double the light furnished by the ten kerosene lamps formerly used in his store.

Some of the arc lights have been provided with new poles of greater length, the higher elevation giving better lighting effect. An objection to higher elevation at other points is the obstruction to the light by foliage and limbs of shade trees, which would require severe pruning to remove the difficulty.

Mr. Frank E. Paine, of Piymouth, has entered the employ of the Weymouth Electric Light and Power Co, and will attend to house and store wiring and other work.

The comrades of Post 58, G. A. R., were taken aback last week in the reception of a letter from their esteemed and zealous Commander, Col. R. S. Lovell, announcing his declination of the honor of a reelection to the office which he had so ably and successfully filled for fourteen years, the fost having been enlarged in numbers during fits administration from 191 members in 1876 to 275 in 1880, the tand of the Post also having been rolled up to the sum of \$13,913.77, this increase laving been largely due to the generous and

seif-sserificing efforts of the Commander, especially at the fairs and entertainments given in nid of the fund. With this praiseworthy record of service it was improbable that the fost would acquiesco in his declination of future service as Commander.

Bring roses, sweet roses.
Precious tribute of love,
And stew them with kindness.
On the green sod above.
For here lies our halting,
Our loved one at rest,
The Saviour halt called her
To the home of the blest.
How fair was the flower,
How brief was the bhonn,
Arrayed in youth's beauty,
Now clothed for she tomis.
Her suffering, her sorrow,
No heart can know.
Twas Jesus who called
And prepared her to go.
In mansions of gluty,

And prepared her to go.

In mansions of glony,
He bade her appear.
Naw gone is the spirit,
The casket lies here.
Though friends mourn in sorrow;
Their loss is her gain;
We would not recall her
To suffering and pain.

To suffering and pain.
The sal tites are over,
The farewells are given,
No more shall we see thee,
' Fill we gret thee in beaven.
Now test dearest 'Mertie'
In the home of thy love,
'Tis the promise of God,
We shall meet thee above.

The following proclam tion, setting apart Timeslay, Nov. 23, no no buy of national thanksgiving, has been issued:

By the President of the United States. By the President of the United States.

A highly favored people, mindful of their dependence on the hounty of Divine Providence, should seek litting occasion to testify graftinds and ascribe praise to Him who is the author of their many blessings. It is hooves us then to book back with thankful hearts over the past year and bless froit of His infinite mercy in vonclosating to our land endaring peace, to our people freedom from pesticence and famine, to our husbandmen abundant harvests, and to them that Now, therefore, I, Renjamin, Harrison, President of the United States of America.

As it whirls us on to Deatle's ocean. The Mysterious Light.

| Sow. therefore. I. Benjamin Harrison. President of the United States of America, do carnestly recommend that Thursiny, the 28th of this present month of November, be set apart as nitav of mational thunksgiving and prayer, and that the people of nure country, cossing from the cares and labor of their working day, shall assemble in their respective places of worship and give thanks for God, who has prospered us on our way and made out paths the paths of peace, beerching Him to biess the day to our present and future good, making it truty one of thanksgiving for each reminist home dries as for the nation at large.

In witness thereof, I have hereunto set my hand and caused that seal of the United States the Itatic.

Mr. Samuel Theomeon has lately sold sense of his gravel hills to the O. C. It. R. corporation. The sale includes some ten mores, the price paid being \$5000. The company intend parting in a side track at once, running from the main tracks near Mrs. T. Blanchard's across the highway into the bills. This is a piece of good fortune for Mr. Thompson and also a valuable acquisition for the Old Colony. The gravel is considered to be of the linest quality to be found on its line.

Our highly esteemed town-man, Mr. The regular toceling of Heynolds Post next Thesekey evening is sure to be an interesting one, largely owing to the letter of resignation which Commander Loyall has given to the press, and it will then be decided whether or not the commales are prepared to take the action recommended by the valuable and esteemed presiding officer. If the sentiment among the South Weymouth veterans can be taken as an index Col. Lovell's retirement and he osked to serve for another year as commander of the Post. There are many reasons why Col. Lovell's retirement at this time would be a mistake und Heynolds. Post, which now rinks innough the best and strongest in the commonwealth, will very likely take the matter into its new bambs and save tim trouble of a contest over the election. It may be that Col. At Brockton last Sunday evening the dents of that city, who were addressed by Hon, Elijah A. Morse on the question of license of the sale of intoxicant-He said.

He said,

1 believe no small part of the present growth and prosperity of this beauting ctylo I Brickten in which you live is due to the no-license we to il labyears and the enforcement of the law by your most excellent and worthy mayor. On the low place of the commercial prosperity of your city you cannot afford to reverse the no-license when a previous years. Real estate dealers in Bosten tell me that one of the impuiries nearly always made with reference to a place where they have teal estate for sale is: "Is it a license or no license lown?" Men will not move to a place where their sons are exposed to the tripplation of the open saleon, and they will leave a place for the same reason. A me-license vote and a closed saloon meons that laboring peaple have more money to spend to hurviers and to the children; it means more of all that goes to adorn and embellish civilized life. When the prohibitory law was first put in force in the city of Des Moines, la., it was predicted that the business interests of the city would suffer. What are the facts! The reverse is true. Where formerly stood low thinking saloons lofty commercial buildings pierce the sky, and the population of Des Moines increased from 37,000 under frense to \$5,000 under prohibition. Sioux City, la was completely under control of the saloons, culminating in the mutder of Hardeck, which had the effect to create a reaction and reverse the policy of the city, and the result is the population of the city has doubled, and the valuation has increased over \$5,000,000 under the policy than has increased over \$5,000,000 under the policy

city of 60,000 inhabitants which does not contain one single salcon or place where linear is legally sold. The enforcement of probibition in Kansa-has carried settlete who have families to rear from all parts of the country to that state. There are children growing up there who never saw a salcon, and it is safe to say that, in consequence of the pol-ticy of prohibition, Kansas today is enjoying a de-velopment and prosperity in precedented in the his-ter of each and pattern out a solitor that is tey in primination, Kansas today is employing velopment and prosperity imprecedented in the lory of states and nations; and a policy that is for Kansas and good for 1 Gwa is good for M cluvetts. A policy which will Increase the mercial prosperity and development, and will tify and adom the cities of Des Moutes, Stock and Tepeka will do the same for the other, stock and Tepeka will do the plane of the coning prosperity and development of this city you syet down the sploons.
